

EasyCLA - 8/29/2019 What's New!

The EasyCLA documentation is now available in GitHub at <https://github.com/communitybridge/easycla/blob/master/docs/getting-started.md>

Here are the ways you can open the documentation in GitHub:

- In [README.md](#), find and click the [Getting Started Guide](#) link.
- Go to the docs folder and click [getting-started.md](#).
- Go to the docs folder, browse the list of markdown files, and open a file for a topic of interest, for example: [Install-the-EasyCLA-Application.md](#).

The EasyCLA documentation in the Linux Foundation Product Documentation remains as a convenience for you, but we will not update it beyond August 29, 2019. For the latest EasyCLA documentation, go to GitHub.
